

TASK

Role : AI/ML

Project: Build a responsive AI chatbot similar to ChatGPT.

Technology: Python

Requirements:

- Develop a conversational AI chatbot capable of understanding and generating human-like responses.
- Create a user-friendly and responsive interface that works across desktop and mobile devices.
- Implement Natural Language Processing (NLP) capabilities for effective conversation handling.
- Ensure smooth interaction with context-aware responses and conversation history support.
- Optimize the chatbot for performance and scalability.
